

a healthy environment is good business for everyone

hp planet partners

HP Planet Partners™ supplies recycling program enables simple, convenient recycling of HP original inkjet and LaserJet supplies.

It's easy. When your HP inkjet or LaserJet supply reaches the end of its life, visit www.hp.com/recycle. Just select the type of product you wish to send back to HP for recycling, and HP will provide pre-paid shipping materials for your used supplies.

HP also offers a service to evaluate, donate or recycle your computer hardware products. For information about this service, visit www.hp.com/recycle.

Environmental responsibility is everyone's business, so rely on HP to recycle your HP printing supplies or your computer hardware.

service feature	hp inkjet cartridge recycling	hp LaserJet supplies recycling	hp and non-hp hardware recycling
more information	www.hp.com/recycle or call 1-800-340-2445	www.hp.com/recycle , instructions and shipping label in new product box, or call 1-800-340-2445	www.hp.com/recycle

cost	no charge	no charge	\$13–\$34 per item depending upon the quantity and type

This recycling program may not currently be available for some HP inkjet supplies.

with global reach comes global responsibility

HP's technology leadership is deeply rooted in invention, and invention is all about building a better future.

To build that future, we're creating sustainable business solutions that will reduce the environmental impact of HP, our partners and our customers. HP's vision is to be a leader in delivering those solutions, and we are deeply committed to full product-lifecycle environmental stewardship.

close the loop — hp inkjet recycling

The best recycling programs aspire to close the loop—to make new products out of recycled materials from the same products. HP is the first to do this for inkjet cartridges; we've invented a patented technology to enable use of recycled plastics in HP inkjet cartridges.

This year, HP will produce more than four million inkjet cartridges using recycled plastic from used HP cartridges.

improving recyclability—hp LaserJet recycling

HP continues to design products that are more recyclable at end of life. Since 1992, HP has reduced the average number of parts used in monochrome HP LaserJet print cartridges by 25 percent and reduced the number of plastic resin types by 51 percent.

the recycling process

All returned cartridges go through HP's multi-phase recycling process. First, packaging is separated and recycled independently. Returned cartridges are then shredded and separated into plastics and metals, which are further separated and used to make new products such as auto parts and lunch trays. Any remaining waste is disposed of in an environmentally responsible manner.

Since HP began recycling LaserJet cartridges in 1991 and inkjet cartridges in 1997, millions of pounds of material have been recycled.
