

Novell GroupWise wireless solution

Go wireless with Compaq

The future of Internet access is mobile. Wireless capabilities bring a new level of efficiency that lets your workforce make better business decisions, work and communicate globally, and operate more productively within the time-critical constraints of today's demanding business landscape.

Make the most of Novell GroupWise 6 with this wireless business solution

One of the best ways to maximize the productivity of your people is through wireless collaboration available from Compaq and Novell.

With GroupWise 6, integrated e-mail, calendar, task lists, daily notes and shared discussions are instantly available. Only GroupWise 6 has out-of-the-box wireless support — so you can use your Compaq *iPAQ™* Pocket PC or any WAP-enabled device or PDA to check e-mail, book appointments and share documents whenever and wherever you are. This means workers can have access to your corporate messaging system — without a PC.

Greatly reduced fees for deskless workers

For the first time, Novell is offering a license that allows deskless workers not running the GroupWise client to access GroupWise through a browser or wirelessly — at a greatly reduced fee. This gives your organization the ultimate flexibility and freedom to collaborate on the move. Your people can communicate, manage their time, and work together on projects to deliver maximum productivity.

Compaq's strengths, your advantages

- > Unparalleled experience — More than 55 percent of Novell GroupWise installations are implemented on Compaq servers, and all of Novell's own mission-critical systems run on Compaq servers
- > Compaq *ProLiant™* servers — Whether you need one processor or eight, *ProLiant* servers offer the industry's best price/performance, availability, scalability, reliability, and ease of management
- > Cross-trained technical support — More than two-thirds of Compaq Accredited Systems Engineers (ASEs) are also Certified Novell Engineers (CNEs) and Master CNEs
- > Compaq Global Services — Compaq is one of the few companies that supports you with a portfolio of world-class services, from planning and design through installation and maintenance
- > Longstanding partnership with Novell — Benefit from the combined strengths of two industry leaders who've joined forces to bring you proven, real-world solutions

Novell GroupWise Wireless Solutions Architecture	
Items	Requirements
GroupWise system	GroupWise 6.0 users: GroupWise 6.0 with WebAccess configured and running. The WebAccess gateway provides wireless functionality without the need for additional software (other than the Web server). All the functionality of GroupWise Wireless is built into GroupWise 6.0.
Web server	One of the following Web servers: > Netscape Enterprise Server running on a NetWare 5.0 server with Support Pack 4 > Netscape Enterprise Server 3.6 for Windows NT > Microsoft Internet Information Server 4.0 or higher for Windows NT SP3 or later > Apache Web Server 1.3.3 or higher for UNIX Solaris
NetWare or Windows NT Server	> NetWare 5.0 or higher > Windows NT 4.0 or Windows 2000
Wireless device	Compaq meets the needs of your growing business by offering Compaq notebooks and Compaq iPAQ Pocket PCs. Both were designed from the ground up by Compaq to give customers the Internet, information, content and access to their business and personal information — anytime, anyplace.
Compaq iPAQnet™ Mobile Internet Service Plan and Sierre Wireless AirCard 300	Compaq brings wireless networking expertise to Compaq notebook computers and iPAQ Pocket PCs. The wireless network provides access* to both device types. It offers coast-to-coast access* to the Internet and Internet e-mail, as well as corporate e-mail and intranets.

*As with mobile phones, coverage is limited to major metropolitan areas.

Novell Wireless WebAccess Server Performance and Capacity				
Server platform	Processor type	Processor speed (MHz)	Form Factor	Maximum users supported per server
ProLiant ML330	Intel Pentium III	1133	Tower	2500
ProLiant DL360	Intel Pentium III	1266	Rack – 1U	3000
ProLiant DL380	Intel Pentium III	1266	Rack – 2U	3000
ProLiant DL580	Intel Pentium III Xeon	900	Rack – 4U	3200
