

Who can you trust to conduct business on the Internet securely?

Compaq ActiveAnswers is a unique online knowledge repository and virtual community that simplifies and standardizes enterprise solutions by providing tools, guides, e-services and technical information from Compaq and its partners. The tools you'll find on ActiveAnswers will help you achieve solutions success with reduced cost, risk and time.

From Internet, eCommerce and enterprise applications to data management, business intelligence, messaging and collaboration and more, on Compaq ActiveAnswers you'll find solutions for just about any IT challenge. Whatever your questions, we have the answers.

A solution you can trust.

Compaq and Check Point Software Technologies, Ltd. have worked together to bring you the most reliable security protection available for your network. You can be sure your firewall has been thoroughly tested and proven, and you can be confident that it will meet your needs — from access control to authentication and encryption to network address translation. You can count on your system to be scalable, upgradable and expandable enough to meet your changing requirements. And you can be certain it will provide top performance thanks to Stateful Inspection technology, patented by Check Point Software Technologies. Check Points Open Platform for Secure Enterprise Connectivity (OPSEC) is both an architecture and an association of security vendors that enables integration into your existing environment.

And now, you can also count on Compaq and Check Point to be a simpler and faster solution to implement, thanks to the tools you'll find on the *Compaq ActiveAnswers* website.

How will *ActiveAnswers* make a difference?

ActiveAnswers contains proven tools and methodologies to simplify and accelerate your Compaq and Check Point solution, reducing your costs and your risks. You'll find a growing suite of solutions for Check Point on *ActiveAnswers*, including:

- Planning guides, with firewall, VPN and content filtering primers, security policy guidelines and recommended configurations
- Installation checklists and deployment guidelines
- Operations guidelines with strategies for backing up and purging log files and managing changing technology

Enterprise-wide, cross-platform security.

OPSEC allows you to integrate multiple third-party security applications and manage them all from a single console. Your anti-virus, URL screening, user authentication and other security applications will work together with your firewall system to form a seamless security barrier for your enterprise.

The right fit for service and support.

Compaq Services provides a wide range of service offerings including a three-year limited warranty fully-supported by a worldwide network of resellers and service providers; lifetime toll-free 7x24 hardware technical phone support; and Compaq Service and Support Programs available on a worldwide basis.

Our leadership brings you complete confidence.

- Compaq is the leading standards-based server provider
- Check Point Software Technologies is the world's number one vendor of firewall systems
- Over 130 vendors of security applications have integrated their products with Check Point Software Technologies software, and it supports over 140 security services and protocols
- Your firewall solution has been thoroughly tested by engineers in Compaq and Check Point Software Technologies labs

Benefits at a glance

- **Confidence In Your Network Security**
Compaq servers bring you tested, integrated and proven solutions from two industry leaders
- **Investment Protection**
Our standards-based hardware and software inter-operate easily within your current environment and easily scale to meet your future needs
- **High Uptime**
High availability is engineered into both hardware and software, so you're protected against unscheduled downtime and its costs
- **Simplicity**
With Compaq manageability features and the power of *ActiveAnswers*, Compaq firewall servers are easier to deploy, manage and maintain over the entire lifecycle
- **Easy Integration**
Quickly build an integrated, enterprise-wide security framework using the Check Point Open Platform for Secure Enterprise Connectivity (OPSEC)

Compaq recommended configurations for Check Point Firewall-1 for NT

Derived from Compaq's performance benchmarks of Check Point Firewall-1, our recommended configurations simplify the hardware selection process by pre-tested solutions which maximize network performance.

Hardware:

- *Compaq ProLiant 800* (350 MHz) with Check Point FireWall Internet Gateway/100 (100 users)
- *Compaq ProLiant 800* (400 MHz) with Check Point FireWall Internet Gateway/250 and Encryption Module (DES)(250 users)
- *Compaq ProLiant 800* (450 MHz) with Check Point Enterprise Encryption Center (unlimited users)

Software:
