Get results with

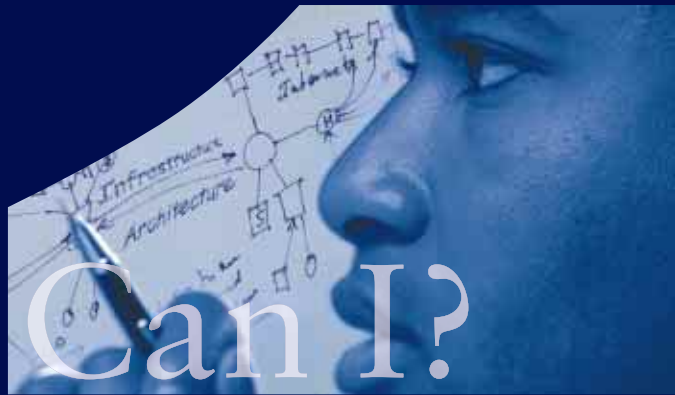

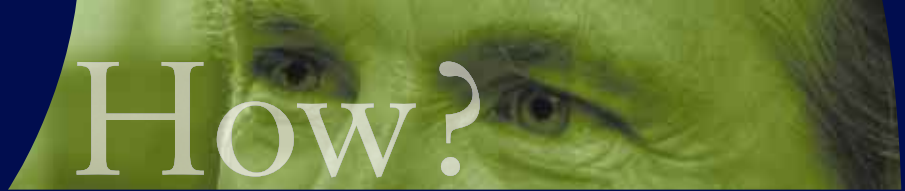

less risk.

How can I do it?

Just ask us. We've been there before.

When you choose our SI software, you're buying our experience. Shoulder-to-shoulder with customers around the world.

Newcrest Mining Ltd. extracts precious metals from mines in Australia and overseas. In such a highly competitive industry and with gold prices dropping, it couldn't afford a Year 2000 problem. Newcrest drew on Compaq's suite of Y2K tools and services to determine its Y2K readiness. Our architecture inventory and assessment gave Newcrest a Y2K solution for the company's administration and logistics center, as well as for mining operations 600 miles away and across the country.

Can I have it Tuesday?

Of course. Our software and expertise get your business solution implemented sooner and get you to market faster.

"It took us only 50 days from the time we completed BusinessBus training to get this into production. Without it, we would have needed a small army of programmers."

— Solutia, Inc.
Ray Mooney, Integration Director

Risk? No thank you.

Our customer-proven software solutions minimize risk and maximize success. You accommodate business process change without disrupting your application integration environment and IT infrastructure.

"At Mercedes-Benz we choose our partners for the same reason that our customers choose our product: quality, reliability, and performance... Work Expeditor enables us to meet and exceed the expectations of our customers."

— Mercedes-Benz Customer Assistance Center
Thor Tielemans, Business Engineering Manager

AMAG

But what about the future?

Our adaptable and flexible solutions grow with you tomorrow and beyond.

E-Plus Mobilfunk needed a network and service management system with the capacity to deal with high-volume data exchange and continuously cope with rapid network expansion. Compaq installed TeMIP in all of the cellular communications company's national and regional network management centers.

Powerful software. Powerful choices. Powerful advantages.

Empowering the enterprise

Enterprise messaging and collaboration

Extend the utility of your Microsoft Exchange and Outlook environment with Compaq Enterprise Suite for Microsoft Exchange Server: Compaq Work Expeditor for document and workflow management... Enterprise Vault for archiving and retrieving aging e-mail messages... Compaq Approval Expeditor for automating routing and approvals... Compaq Correspondence Manager for efficiently distributing need-to-know-information.

Connecting the enterprise

Telecommunications industry solutions

Get there first, deliver the best, manage costs, and reduce risk with software platforms and tools for telecommunications customers. TeMIP for end-to-end network and service management... DECss7 for Intelligent Networks that help you quickly deploy new services... Fraud Management System to detect and analyze fraud.

Enabling the enterprise

Cross-industry technologies

Assess and ensure Year 2000 readiness with our Y2K tools... Effectively manage your IT infrastructure's performance with Capacity Planning tools... Manage your network from a central point with Enterprise Management software solutions.

Integrating the enterprise

Enterprise applications software products

Stay agile as you easily integrate enterprise application systems (ERP, CRM, SCM) with legacy and other applications using BusinessBus for R/3... Manage your data explosion electronically with Compaq Archive for R/3.
