Compaq R/3PAQ on Tru64 UNIX

Certified, fully tested SAP solutions

What should you look for in your SAP solution provider?

- *Leadership*
- *Experience*
- *Expertise*

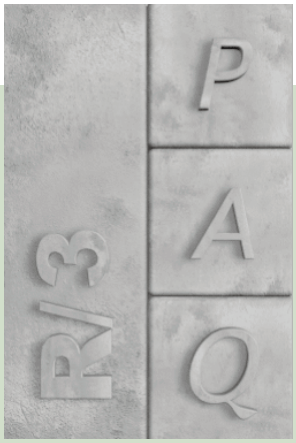
You will find them *all* at *Compaq*.

- **Number-one SAP solution provider worldwide**
- **More than 5,500 SAP installations on Compaq platforms**
- **The industry's most advanced centers for SAP-certified solution development**

Compaq R/3PAQ™ on *Tru64 UNIX*

SAP accelerated solutions on easy-to-order, pre-configured, fully tested and certified 64-bit Alpha systems deliver faster time to solution.

Compaq AlphaServer ES40
Compaq AlphaServer DS20



Highlights

Compaq speeds your time to success with:

- Compaq-certified, pre-sized, factory-integrated configurations for rapid, low-risk implementation
- Compaq-certified, configured-to-order factory-integrated solutions tailored to meet customer-unique requirements
- Optional in-factory services from SAP Basis-certified engineers for quick, complete, low-risk deployment

COMPAQ | SAP

Tru64 UNIX SAP R/3 solutions from Compaq provide reduced total cost of ownership with price/performance leadership, seamless interoperability with Windows NT, and accelerated integration and installation.

Doing it by the numbers

Implementing an Enterprise Application shouldn't be left to guesswork. That's why Compaq created the *SAP Competency Centers* — advanced facilities dedicated to SAP deployment. At the Center in Walldorf, Germany, Compaq and SAP engineers certify SAP applications on *Alpha Tru64 UNIX* platforms based on number of users, sites, and transactions, and database size and growth rate.

In Houston, Texas, and other Centers, engineers and consultants build on the work done at Walldorf to ensure reliable and proven SAP installations. By designing the optimal solution for your needs — by the numbers — we help you get it right the first time.

Visit the *Compaq SAP Competency Center* web site at **www.compaq.com/partners/sap/solutions/index.html**

Compaq AlphaServer platforms

The *AlphaServer* ES40 is an ideal platform for *R/3PAQ* solutions. With up to 16 GB of ECC memory, the ES40 server delivers mainframe performance at midrange prices. It is simply the fastest four-processor RISC server available today. For smaller *R/3PAQ* environments, choose the dual processor *AlphaServer* DS20.

StorageWorks RAID storage systems are included with all *R/3PAQ* solutions delivering scalable, high-availability storage with a very low cost of ownership. Both Fibre Channel and UltraSCSI RAID are available.

A choice of UNIX implementations

We provide *Compaq R/3PAQ* and *Configure-to-Order* (CTO) solutions in two-tier or three-tier implementations. The two-tier deploys a client and a production server. The three-tier version comprises client, application server, and database server. We can also deliver specific configurations for development, test, training, or other needs.

Configure-to-Order high-availability solutions

If your business demands a tailored high-availability or disaster tolerant solution, no company has more experience delivering what you need than Compaq. With the fastest failover in the industry, Tru64 UNIX clusters are fully configured, integrated, and tested for fail-over and provide an industry-standard availability level of 99.99% uptime per year.

Factory integration – no surprises

Let's face it, it's better to assemble and test complex solutions in a controlled environment where problems can be quickly identified and easily remedied. That's why we build your *Compaq R/3PAQ* and *Configure-to-Order* solutions under strict ISO 9001 and Compaq-certified procedures.

Shipped fully operational

Factory-integrated, tested, and shipped in space-saving, high-density cabinet configurations with every cable and connector in place, your SAP solution arrives at your site fully assembled. We've loaded the operating system and configured the RAID arrays to your specifications so the system is ready for the SAP R/3 installation.

Optional services deliver plug-and-run deployment

Compaq provides optional *in-factory* services including database loading and SAP installation by *Basis-certified engineers*. We can also install SAP's Preconfigured Client. The system arrives at your site precisely configured to the implementer's specs. This cuts on-site installation time and risk down to just about zero.

Optimized support for the system lifecycle

With 550 locations in 114 countries, Compaq offers worldwide service and support for SAP enterprise applications. Working with key partners, we cover the entire implementation process from planning and design through operational support and system management services. This includes 7 x 24 x 365 mission-critical coverage for uninterrupted business operations.
