

# Compaq Y2K Small Business Inspect

**Think you'll  
be ready?**

**Are the PCs  
that run  
your business  
ready for the  
millennium?**

**Protect Your  
Personal  
Computing  
Environment**

If you're unsure what to believe about the Year 2000 (Y2K) millennium bug, think about this.

The bug impacts personal computing across the board — PC hardware, operating systems, application software, and data. While there is considerable awareness about Y2K, it is critical for PC users to recognize that hardware-level problems represent a small fraction of the potential Year 2000 issues facing PCs. A personal computer system is Year 2000 ready when all of its elements are ready. That's why Y2K Small Business Inspect, based on Greenwich Mean Time Check 2000®

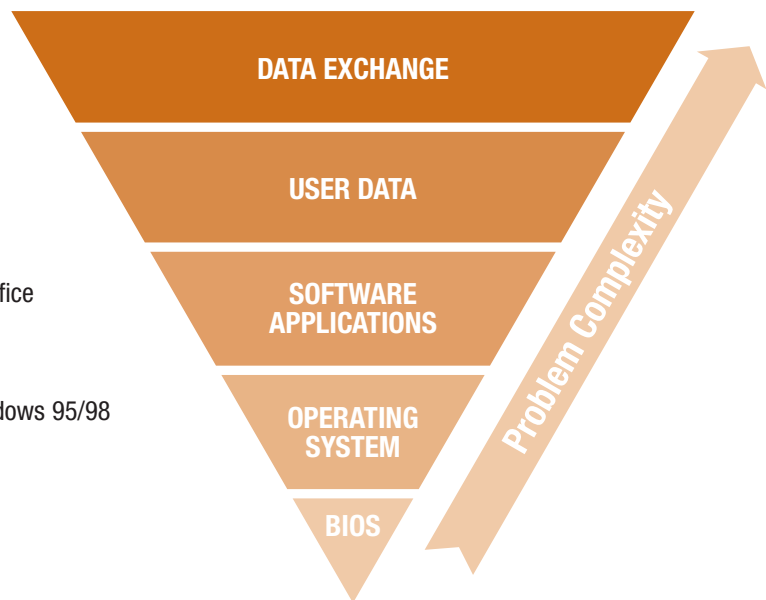

software and Compaq's award-winning service, is specifically designed for businesses that want to ensure that their PC environment is prepared for the millennium across the board — PC hardware, operating systems, application software, and data.

**Confidence That  
Comes From A  
Thorough Assessment**

The only way to confidently ensure your business systems are Y2K ready is to test every PC down to cells in individual spreadsheets or databases. The Compaq Y2K Small Business Inspect solution performs a comprehensive assessment of Year 2000 readiness, targeting all five at-risk layers in a PC.

## Five-Layer Year 2000 Problem

- 5** Data sharing, OLE, vendor interface, data importing, data exporting
- 4** Shared data repositories, local data, database files
- 3** Commercial applications, including office automation software, electronic mail
- 2** DOS, Windows 3.X, Windows NT, Windows 95/98
- 1** Platform hardware and firmware

SERVICES

**So Easy You Can Run  
The Tests Yourself** Compaq  
Y2K Small  
Business

Inspect is designed specifically for small business owners who want to thoroughly and effectively assess their systems for Y2K readiness without having to make a substantial IT investment. Y2K Small Business Inspect is user installable, and test results are presented in an intuitive, easy-to-understand format.

At the conclusion of the system tests, Compaq Y2K Small Business Inspect provides a detailed report of the software applications and data most at risk and outlines specific action you should take to reduce risk. You can rerun the program at any time and recheck your systems for readiness.

**Support Just  
In Case** The Compaq Y2K  
Small Business  
Inspect solution

includes Technical and Advisory Telephone Support, which entitles you to telephone support in case you have questions or need assistance. When you call, you'll be connected to

a Y2K specialist who can answer your questions, clarify the test results or give you advice on a recommended problem fix.

Additional support time is available should you require extended support.

**Most  
Comprehensive  
Assessment** You depend on your  
PCs to help manage  
your business day  
to day. Compaq Y2K Small Business  
Inspect is an affordable, easy-to-use  
tool for assessing the impact of the  
Year 2000 on your business systems.  
Compaq Y2K Small Business Inspect  
performs a comprehensive assessment  
using the software referred to as "the  
best of the lot" (December 14, 1998—  
PC World Magazine) and also offers the  
advisory and telephone support of  
Compaq Services.

**For More  
Information** For more information  
about the Compaq  
Y2K Small Business  
Inspect solution, contact your  
authorized Compaq Reseller.

## Technical Requirements

An IBM-compatible PC with one of the following Microsoft operating systems:

- ▶ Windows 95
- ▶ Windows 98
- ▶ Windows NT 4 with SP3

30 MB available hard disk space

16 MB RAM
