Get o*N* *T*rack for Windows 2000!

Windows for the Enterprise

With Compaq Services as your trusted NT advisor, you can confidently move ahead with Windows NT today while staying o*N* *T*rack for Windows 2000 tomorrow.

As your company moves beyond file and print services to implementing business critical enterprise ERP applications, Microsoft® Exchange, and web-based applications on Windows NT®, you look forward to the advent of Windows 2000. Your company wants to reap the benefits of this new release, including:

- Enterprise scalability and manageability through Active Directory (AD)

- Improved security through Kerberos 5 and NTFS encryption

- Easier deployment of Internet/intranet infrastructure through IP Security Management and Virtual Private Network (VPN)

- Increased performance through 64-bit Very Large Memory (VLM) support on Alpha platforms

- Reduced Total Cost of Ownership (TCO) through Zero Administration Windows (ZAW)

Your business needs it. But you must reduce risk and minimize disruptions. Your business depends on it.

Planning

Why get oN Track for Windows 2000?

The best way to ensure a timely and predictable Windows 2000 implementation is to start planning today. As you install, expand or tune your Windows NT infrastructure, each decision you make can impact the ease with which you transition to Windows 2000. With Compaq Services as your trusted NT advisor, you can relax, knowing that each step will be a move forward. Our consultants are already trained in Windows 2000 and ready to help.

In particular, we can review the current infrastructure design to ensure your:

- Domain structure is prepared for Active Directory

- Existing naming services allow interoperability with Windows 2000

- Next generation applications will take advantage of Windows 2000 capabilities

And, when Windows 2000 arrives, we will be with you to rapidly deploy your new infrastructure.

Compaq Services — your trusted NT advisor

Compaq Services has more NT service professionals at the highest level of certification than any other vendor. We have 2200 MCSEs and MCSDs with a commitment to reach 3000 by December, 1999. We also have 14,000 service professionals who are trained on Microsoft technologies. Compaq Services has migrated over 1.5 million seats to NT from multivendor environments and has millions of Microsoft Exchange seats currently under contract. With more than 3000 UNIX® consultants, we have integrated NT into hundreds of multivendor UNIX environments.

Compaq is the first service provider to develop an NT Solutions Architect Program that augments the Microsoft certification process. Our solution architects have 15+ years of experience and our program managers have 10 to 15 years of experience delivering complex, global engagements.

Compaq has maintained a close relationship with Microsoft for 11 years. Compaq is the only company endorsed by Microsoft as Worldwide Prime Integrator for Windows NT. We are also a Microsoft® Solution Provider with more than 120 programs and a member of the Microsoft Service Advantage Program. As a tier one member of the Microsoft Rapid Deployment Program (RDP), Compaq has done extensive internal testing and planning for Windows 2000 on our own global infrastructure.

A complete portfolio of oN Track for Windows 2000 services

No matter where you are in your NT implementation lifecycle, Compaq Services, with its team of best-in-class technology partners, can help you achieve the competitive advantage your business requires. As your trusted NT advisor, we can help plan, pilot, design, implement, manage, and support your Windows NT infrastructure — always with Windows 2000 in mind.

Our oN Track for Windows 2000 services will help you build a secure enterprise infrastructure that can support your most business critical applications. Compaq Services will guide your migration every step of the way, ensuring a smooth and successful journey. And we won't leave you behind when it's finished. We'll be there to support you as long as we're needed.

Call Compaq Services today and be on your way to Enterprise NT!
