

IDX multi-server platforms from Compaq CustomSystems

Power-packed, space-saving configurations for IDX applications

Clinical and business solutions for the healthcare enterprise

Compaq and IDX Systems Corporation deliver industry-leading clinical and business solutions with hardware, operating systems, middleware, and web-enabled applications integrated and maintained across secure networks.

In addition, we can guarantee levels of availability ranging from high to continuous in local, regional, and global settings.

Running room for the IDX environment in a high-density footprint

- *Versatility and availability with Compaq ProLiant servers*
- *Performance, scalability, and high availability with 64-bit Compaq Alpha systems*
- *Continuous availability with the Compaq NonStop Himalaya environment*

BA356 StorageWorks shelf
Max. disk storage: 252 GB

AlphaServer 800

Expansion space

Himalaya S-Series

An IDX-specific configuration such as the one pictured here is fully integrated, staged, and tested at Compaq CustomSystems ISO 9001 manufacturing facility and then shipped full assembled. And it's covered worldwide by industry-leading Compaq service and support.

Highlights

- *Tools to build and maintain Integrated Delivery Networks*
- *Lifecycle support with streamlined ordering, delivery, implementation, and maintenance*
- *Full assembled and tested factory-integrated platforms reduce risk and simplify implementation*
- *Support for the Windows NT, OpenVMS, NSK, and Tru64 UNIX operating systems*
- *High-density footprint packs more power into less space*

Integrated, interconnected applications from IDX

Building on a twenty-year history of innovation, IDX Systems Corporation and Compaq continue their partnership in developing and implementing cross-platform and cross-application connectivity. The IDXtendR™ line of integrated software products streamlines patient care and other workflow processes by capturing, managing, and making accessible information within healthcare organizations and throughout Integrated Delivery Networks.

Open, web-based solutions

IDX clinical and business solutions are built on a dynamic, configurable, and secure web-based framework. They integrate work flow across IDX and third-party applications with single login and security, sharing of patient context across applications, common user interface and navigation — all within a low-cost, thin-client environment.

Decision support

One of the most important challenges facing IDNs is tracking outcomes, not just for meeting reporting requirements, but to pinpoint areas for quality and business improvement. IDX solutions make it easy for clinicians, managers, and executives to put data to strategic use for outcomes analysis and decision support.

Factory integration – no surprises

Compaq *CustomSystems* assembles and tests ProLiant, Alpha, and NonStop® Himalaya multi-server platforms in our ISO 9001 certified manufacturing facility. Every part down to the shortest cable is accounted for, connected, and tested to ensure each platform works as specified.

Delivered fully assembled and tested

Factory-integrated, tested, and shipped in space-saving high-density cabinet configurations, the platform is delivered fully assembled and ready to load your choice of IDX applications.

Support services

Compaq is a proven provider of multi-architecture support for the leading client/server hardware, software, and networks that you depend on in today's increasingly global enterprise computing environment.

We work closely with Compaq Business Partners to ensure that you receive the best level of service available today.

Our support network reaches worldwide, nonstop, 24 hours per day, 365 days per year. You can count on Compaq expertise, life cycle support, multi-architecture experience, and worldwide coverage.
