Adaptec, Inc.

ADAPTEC® EZ-SCSI®

If you have, or are planning to add, SCSI peripherals like tape or disk drives, CD-ROM drives, recordable CD-R drives, magneto-optical drives, or scanners, Adaptec EZ-SCSI® software provides everything you need to manage and take full advantage of each device.

Adaptec EZ-SCSI software is a suite of 32-bit practical applications and power tools that are remarkably easy to install and use. Simple desktop controls give you immediate access to any fuction. A unique online tutorial explains everything you need to know about SCSI in easy-to-understand terms.

Key benefits:
* Easiest way to manage SCSI peripherals
* For Windows operating systems
* Includes these practical applications: Adaptec Easy-CD Backup™, QuickScan™, Audio CD player, Photo CD Viewer, CD Writer, and CD Copier
* Includes these powerful tools: SCSI Explorer™ (Power Management, SCSI Interrogator™, Read/Write Disk Cashe tool), SCSI Tutor™, SCSI Bench™ and Drive Light™.

DOS-TAR®

DOS-TAR® is a fast, UNIX tar compatible, backup and file transfer system. It is ideal for transferring files from DOS to UNIX, or vice versa. DOS-TAR® features include master and incremental backups, bit-level verification, support for Fast SCSI Seek devices, error recovery, and speed. On Fast Seek devices, Dostar can restore a file from the end of a 5 Gig tape in under 25 seconds. DOS-TAR® can also convert UNIX filenames, pathnames, and ASCII data to DOS, on the fly. DOS-TAR® as a standalone backup system for MS-DOS is 10 times faster than the DOS backup utility. There are optional Tape Drivers for SCSI and QIC-02 devices.

AIR-BAG

AIR-BAG reconstructs SCO UNIX and XENIX from hard disk failures. The AIR-BAG will completely recreate all data, partitions, device drivers, kernal link, symbolic links, empty directories and more. It is fully menu driven and offers an automatic restore mode for the UNIX and XENIX impaired. The SCO UNIX version allows restoring to a completely different type of hard drive or hard disk controller. No other crash recovery software on the market is as safe and reliable, or offers as many features. Twenty-four hour support is available for emergencies.

UNITE CD-MAKER

Unite® CD-Maker is a 32-bit software package for creating custom CDs. Unite CD-Maker allows users to quickly and easily make audio CDs as well as create CD-ROMs for backup, archiving and distribution of data. Included with Unite CD-Maker is a 32-Bit API set for automating the recording process. Advanced features include multisession support, enhanced CD and mixed mode support and a visual buffer meter to monitor the burn. Many recorders are supported and Windows 95, Windows NT and OS/2 are supported.

CORELSCSI PRO

CorelSCSI Pro® is a high-performance software product designed to maximize SCSI performance. CorelSCSI Pro provides: support for SCSI scanners to scan images into any TWAIN-compliant graphics program; a CD-ROM server application that allows network users to retrieve recently-accessed information with essentially no delay; and a utility that writes information to a compact disc using a CD-Recorder. These features and others are available using an intuitive and friendly interface.

TAPEBOX

The TapeBox™ series of tape arrays provides a unique hardware solution for medium to large computer systems and networks. Adaptec controllers are combined with hardware and software to provide a flexible high performance data storage and retrieval system. Configurations include Multi-single drive (with independent IDs), mirroring, cascade, and striping. Offline tape duplication and testing is also possible. Our patented concurrent backup can copy data to tape without the need to shut down running applications. All systems include an integrated data cache which greatly improves performance.

AP/SCSI

The Kraft AP/SCSI software package provides the ability to interface reliable SCSI tape drives to the Advanced Pick/Native operating system. The device driver software supports popular Adaptec® SCSI controllers and many SCSI tape drives. Compatibility with standard Pick tape operations is assured. All Advanced Pick tape functions including file-save, account-save, sel-restore, account-restore, t-verify, t-dump/load and basic tape I/O are supported. QIC compatible SCSI tape drives allow data interchange with QIC-02 tape drives. High capacity 4mm and 8mm tape drives with data compression can provide storage capacities up to 8GB. Backup data rates up to 16MB/minute can be achieved with fast systems and tape drives.

Lone Star Software Corporation

LONE-TAR

Lone-Tar® is a reliable back-up software for UNIX. It has built-in compression that is guaranteed to at least double the capacity of any backup device. It also includes Intelligent Bit Level Verification that compares every byte of data on your backup to every matching byte of data on your hard disk. Lone-Tar's TAPE-TELL monitors every backup and lets you know which tape you are overwriting. Best of all, Lone-Tar is hardware independent and has a user friendly menu interface that includes source code for the UNIX impaired.

Maxoptix Corporation

MAXLYB

The Maxoptix MaxLyb family of optical auto changers utilizes the T4-2600 drives to deliver high performance and reliable specifications. The MaxLyb family covers a wide range of capacities - 26GB to over 600GB, which ensures the most useful library is available for a variety of applications.

With the MaxLyb family of optical storage libraries, Maxoptix offers the widest selection of optical library solutions and fills the price-performance gaps left by other storage technologies. With the fastest on-line access to stored data and information, they are the logical choice for those who need top performance, demonstrated reliability and future expandability at competitive prices.

DOSTAR

DOSTAR offers a comprehensive backup/restore solution for DOS-based PCs. Rather than a proprietary format, DOSTAR uses the "tar" format, a standard for years on all UNIX systems. This product provides full, bi-directional compatibility between MS-DOS® and virtually any UNIX or XENIX® system. Versions are available for SCSI tapes, QIC-02 and QIC-36 tapes, and floppy diskettes of over 40 different types.

BAKUPWIZ

BakupWiz™ quickly and reliably backs up your local and networked drives to SCSI tape from a DOS or OS/2 platform. It is very flexible: it can back up all files, any files you select, or any files that have changed since a specified date and time. Novell NetWare and any NetBIOS-compatible networks are supported. Under NetWare, BakupWiz will back up and restore both file and network security information without sacrificing speed, and the network file server may be backed up while users are still logged onto the system. NetWare 286 and 386 as well as Apple® File Protocol are supported.

Performance Technology

POWERSAVE

POWERsave™ 3.2 for Banyan® backs up all Vines® file services, supports Vines 5.5 for extended directory-level and file-level ARLs, supports all StreetTalk associated records and automatically recreates lost services and groups when restoring the StreetTalk database. It has up to twice the workstation performance with NetBIOS replacement and no need to configure Banyan NetBIOS.

POWERsave 4.0 for NetWare automatically backs up all bindery and trustee files from a Windows® workstation; supports extended file attributes, Macintosh files, NDS support, and last access date; allows a named user, other than the supervisor, to do the backup; and updates last archived date.

POWERsave 4.0 for POWERLan™ (now with support for Windows) and LANtastic 3.2 are complete backup and restore solutions for POWERLan and LANtastic networks.

Pioneer Hi-Fi (GB) Ltd.

PIONEER

HOST ADAPTERS TESTED

AHA®-2940/4/U/UW
AHA®-3940/W
AHA®-3940U/UW

Pioneer, the leading manufacturer of optical disc technology has developed a solution utilizing it's high storage CD-ROM autochanger. This solution provides stored video clips directly to designated PC's. The Video Browse Server enables users to view the whole of a video library on a PC. This application has a user friendly and logical GUI. The video clips never physically leave the library, hence no time lost tracing material. All of the video is held on CD-ROMs locked away in a 500 disk autochanger. Initially by the use of alphanumeric entries a search can be narrowed down to several titles. A selected title gives further indexed information on the clip and also more importantly at least two thumbnails. The chosen clip can then be viewed on a PC terminal. By selecting various clips the user automatically generates a clip list. This file can then be sent to the compiling station on the network. The compiling station then assembles the request on any chosen broadcast medium- D1, D2, D3, D5, Digital Betacam, Betacam, Disc etc.

DATMAN

DATMAN™ is a revolutionary DAT control software which provides an MS-DOS compatible file system with up to 8-GB and a quarter million files. Unlike typical tape backup programs, most MS-DOS and Windows applications can directly read and write files on the tape. DATMAN makes the DAT drive operate very much like the familiar floppy drive. Once it is installed, it is extremely easy to use. Also, it removes the common access bottleneck to the huge online storage. With the sophisticated adaptive cache algorithm, DATMAN provides high-performance file access.

Palindrome™ Backup Director is the complete backup and restore software for any size LAN. Backup Director provides everything you need to protect your Netware software, applications, and data safely and reliably. The software includes proactive alerting and error-correction systems. Backup Director's scalable performance, up to 700 Mb per minute, gives you the fastest, most automated and reliable backup possible. Backup Director supports the widest array of backup devices and platforms and gives you the flexibility to customize your own backup schedule or use a predefined media rotation scheme. With the unique Windows® Control Console Interface, you can monitor all operations and complete tasks with a few simple mouse clicks. Palindrome File Manager makes it easy and safe for users to restore their own files ensuring full network security is maintained. For restoring entire servers, Backup Director helps you create a recovery diskette that automates the process, and eliminates the need to fully reinstall NetWare or Backup Director. Native NetWare Directory Services (NDS) and full SMS compliance makes it the best backup for both Netware 4.x and 3.x users.

PALINDROME STORAGE MANAGER

Palindrome™ Storage Manager is the integrated backup, archiving and HSM software for growing networks. Built on the powerful backup and restore capabilities found in Palindrome Backup Director, Storage Manager delivers powerful capacity management features, including migration, file tracking and retrieval, archiving and Heirarchical Storage Management (HSM). Storage Manager lets you take a step-by-step approach to capacity management based on your needs and resources. You can start by migrating files manually, then move to scheduled migration schemes that automate the process for you and ensures disc space availability. By moving to continuous disc monitoring with event-triggered, real-time migration and recall, you have a full HSM system that optimizes your administrative resources and hardware investment.

SYTOS PREMIUM

Sytos Premium is a high performance backup and disaster recovery software offering complete OS/2 workstation and network server protection. For standalone workstations or network servers running LAN Server. Sytos Premium offers the most flexibility, reliability and performance without compromising ease of use. Complete system protection is provided by a disaster recovery utility. Should your hard disk become corrupt, Sytos Premium reinstalls OS/2 and performs a restore from the last full backup automatically, restoring your system within minutes. Includes extensive QIC, SCSI and minicartridge support.

SYTOS AUTOLOADER

Sytos Autoloader is a device support utility for multiple tape backup devices attached to OS/2 workstations or servers including IBM LAN Server and Microsoft LAN Manager. As an add-on support module for Sytos Premium, Sytos Autoloader automates the backup process for autoloaders, and gives you the flexibility to configure your device as a single backup device or as a set of backup devices. With Sytos Autoloader, you can run large multi-tape backups or several smaller backups without user intervention. The software automatically selects tapes, changes tapes and runs scheduled operations completely unattended.

PRINT MAGIC

Print Magic™ is a high-speed, high-quality printing system for Microsoft Windows 3.x and Windows 95. It is available to OEMs for use with SCSI and non-SCSI printer peripherals. The product supports both the ASPI and Adaptec EZ-SCSI interface to color printers (dye sub, inkjet and thermal wax transfer). Print Magic™ is easily customizable and quick to develop advanced drivers. Diffusion printing, CMY, CMYK, 24-bit color, bi-di and color match options are all standard.

TAPEDISK Corporation

TAPEDISK® PROFESSIONAL

TAPEDISK earned PC Computing Magazine's Most Valuable Product Finalist status for 1994. TapeDisk turns your SCSI (DAT/DDS-2, 8MM, and some QIC) tape drive into a logical disk drive by assigning a drive letter! DOS/Windows/Windows 95 applications can write data directly to, and read data directly from tape. Backup of an entire disk with DOS commands like XCOPY, or move files with File Manager or Explorer. Unlike traditional backup software, files do not have to be restored to the hard drive: open, edit and print files directly from the tape. Long file names are now supported. TAPEDISK files are accessible across peer-to-peer networks like Windows for Workgroups, Lantastic, InvisibleLAN and POWERLan. A SCSI tape drive, using TAPEDISK, can be "mapped" from a client to a Novell server just like a hard drive.

TAPEDISK Corporation

TAPEDISK AL

TAPEDISK AL adds autoloader support to TAPEDISK Professional. Currently supported is the Hewlett-Packard C1533A 6-tape auotloader, also known as the SureStore 12000E. TAPEDISK AL automatically locates, inserts and loads the requested 4MM DAT tape from the six slot tape magazine. Within the time it takes to load a tape cartridge, up to 21 gigabytes of uncompressed data is available. Other autoloader tape drives will be supported. TAPEDISK AL is sold separately or is available as an add-on to TAPEDISK Professional.

Valitek, Inc.

PST 2 SERIES TAPE BACKUP

Valitek manufactures portable tape backups that work through the parallel, serial or SCSI port and are designed to be shared among multiple PCs, laptops, and file servers. Valitek ships its tape backups with the Valitek Tape Backup Software—a DOS application that drives the unit—either parallel or serial. The drives can be used on the SCSI port via a third party tape backup software package (Cheyenne, ARCSERVE, Central Point backup, Norton Backup for Windows, etc.) The PST2 Series of tape drives is available in eight models: the PST2 500, 1000, 2400, 5000, M2000, DAT2, DAT2+ and the DAT4+ with capacities ranging from 250MB to 4GB (uncompressed).
