1776, Inc.

1776 DISK ARRAY SOFTWARE

1776 Disk Array Software™ enhances system availability and disk performance under UNIX (on AT® bus, EISA and Micro Channel® systems) by providing on-line storage management, mirroring, striping, RAID arrays and dual-computer fault tolerance using Adaptec® intelligent host adapters. 1776 software achieves maximum performance and dependable recovery from disk errors, due to its built-in device driver written specifically for Adaptec SCSI host adapters.

1776 MULTI HOST SOFTWARE

1776 Multi-Host provides a new higher level of high-availability using Adaptec® host adapters under SCO operating systems. Two systems are connected so that if one fails, the other takes over. Also, the user load can be shared between the two systems for higher performance. This is done by connecting the servers to a common SCSI bus and thus share common disk storage. If one system should fail, the other can take over its operations automatically and almost instantly, and have immediate access to up-to-date user data. By including fault-tolerant device drivers designed specifically for Adaptec host adapters, a very high level of reliability is achieved.

ADAPTEC® CI/O™

With easy to use Adaptec® CI/O™ software, managers can monitor all SCSI peripheral devices connected to servers by Adaptec® host adapters.

Using Adaptec® CI/O™ software on any Windows® client, managers can remotely monitor the I/O performance of any server on the network from a single central location. Managers can install the latest device drivers from a remote location as well.

Adaptec® CI/O™ software automatically detects failure of any SCSI device on a network server and notifies the manager immediately. With a clear view of I/O traffic, managers can spot bottlenecks and act quickly to balance I/O loads to optimize performance among SCSI devices. Adaptec® CI/O™ improves the manageability of any size network--from a single server to a global network.

LONE-OPTIMIZER

LONE-OPTIMIZER is a UNIX and Xenix disk optimizer that increases the speed of your system by 20% to 75%. It is fully menu driven for the UNIX impaired making it extremely easy-to-use. The LONE-OPTIMIZER offers a practice mode to let you see exactly what happens before an actual optimization begins. With LONE-OPTIMIZER you can change the high-level interleave on the fly. This feature alone can double system performance. It consolidates all directory information and keeps it next to the inode table for maximum file lookup performance.

Corel Corporation

CORELRAID

CorelRAID™, a software solution for data security, is a cost-effective way to safeguard your network data. At a fraction of the cost of proprietary hardware solutions, CorelRAID provides fault-tolerant network performance with minimum disk space overhead. CorelRAID supports RAID levels 4 and 5 in the NetWare 3.11 environment. With a minimum of three SCSI hard drives and any ASPI-compatible SCSI controller, you can install several arrays in minutes. If a drive failure occurs, arrays are repaired with no downtime using either the "hot swap" or "hot standby" features.

Delphi Data

RAIDER EO ARRAYS

The RAIDer™ series of disk arrays and EO disk arrays provide unique hardware solutions for desktop to mainframe computer systems. Configurations include RAID 0, 1, or 1+ and 10+. Our patented concurrent backup can copy data to tape or optical media without the need to shutdown running applications.

The RAIDer series of JukeBox arrays have configurations including one (1) or more JukeBox mechanisms. A single SCSI ID can control a mirrored set of mechanisms providing transparent redundancy. Tape backup of a JukeBox can be performed offline or concurrently during normal operation.

All systems include an integrated data cache, up to 256Mb per CacheBox, which greatly improves performance.

Legacy Storage Systems

SMART ARRAY®, SMART ARRAY XE

Legacy's SmartArray® family of disk array subsystems offer the best combination of performance and fault tolerance for mission-critical servers. Available as either a storage tower or rack-mount, SmartArray subsystems accommodate every major storage technology: hard disk, CD-ROM, and tape (DAT, QIC, and 8mm). Devices and power supplies are hot-swappable for zero-downtime applications. The advanced intelligent monitor displays device, power supply, temperature, and fan status. It also monitors RAID rebuilds and detects duplicate SCSI IDs. Visual and audio alarms indicate error conditions, and messages can be broadcast by MHS or SNMP, or via pager.

SmartArray supports up to 6 SCSI-3 Fast/Wide buses, and all major operating systems.

Logicraft Information Systems

THE JUKEBOX MANAGER

The Jukebox Manager™ option for Logicraft's LanCD™ network server software provides a versatile solution for networked access to archived CD-ROM storage. It is modular in design, hardware independent and non-vendor specific for jukebox support. Features include Document Image Management, static directory or platter caching and DDC (dynamic hard disk cache), asynchronous access, multiple jukebox support, Intelligent Optical Reader Selection, local on-line management, and support for up to 1280 platters and 56 readers per LanCD server. With up to 10 servers per client, each user could have access to more than 12 thousand CD-ROM discs.

FASTCD™, LANCD

FastCD™ is an option available with Logicraft's LanCD™ networking software for providing multiple concurrent access to CD-ROM applications in a multi-platform, multi-protocol networking environment. FastCD creates "virtual CD-ROM discs" on fast, high performance SCSI hard drives by caching the entire contents of a CD-ROM in its native format onto a FastCD partition of the hard disk, providing users with easy access to their CD-ROM applications at hard disk speeds up to 300 times faster than standard CD-ROM drives. FastCD software includes comprehensive status reports, multimedia support, and asynchronous disk access for higher throughput during multiple concurrent accessing.

CDEXECUTIVE™ CD-ROM NETWORK SERVER

The CDexecutive /XF5500 CD-ROM network server provides a turnkey solution for multiple concurrent accesses to CD-ROM applications in a multi-platform, multi-protocol environment. The Pentium™ based XF hardware architecture is bundled with Logicraft's high performance CDexecutive Management Center software that automatically monitors and manages CD-ROM applications as a background Windows NT™ service. Client support includes Windows® 95, Windows® for Workgroups, Macintosh® and NetWare clients. The XF server holds up to 14 SCSI devices and comes equipped with IDE hard drive, network interface card, floppy drive and SCSI host adapters. It runs at 120MHz, has 32MB of RAM and supports up to 56 SCSI devices.

INTELLIGENT STORAGE

Intelligent Storage™ is a fault-tolerant SCSI storage subsystem for hard disks, optical disks and tape drives. Features include distributed power with redundant, hot removable and replaceable power supplies and removable storage devices, including those with removable media. It provides the highest level of fault tolerant, redundant power and removability while continuing full operation. It will accept any standard 5.25" or 3.5" storage device.

IMMUNITY

Immunity® Disk Mirroring Software v2.2 is a cost-effective RAID 1 product that provides system fault tolerance for DOS and Windows based PCs and LANs. The device driver duplicates (or mirrors) every "save" to two hard disks through one or two (duplexed) controllers/host adapters. If one of the hard disks fails, the device driver instantly re-routes all reads and writes to the remaining hard disk with no loss of time, defaults or data.
