ADAPTEC® EZ-SCSI®

If you have, or are planning to add, SCSI peripherals like tape or disk drives, CD-ROM drives, recordable CD-R drives, magneto-optical drives, or scanners, Adaptec EZ-SCSI® software provides everything you need to manage and take full advantage of each device.

Adaptec EZ-SCSI software is a suite of 32-bit practical applications and power tools that are remarkably easy to install and use. Simple desktop controls give you immediate access to any function. A unique online tutorial explains everything you need to know about SCSI in easy-to-understand terms.

**Key benefits:**

- \* Easiest way to manage SCSI peripherals
- \* For Windows operating systems
- \* Includes these practical applications: Adaptec Easy-CD Backup™, QuickScan™, Audio CD player, Photo CD Viewer, CD Writer, and CD Copier
- \* Includes these powerful tools: SCSI Explorer™ (Power Management, SCSI Interrogator™, Read/Write Disk Cache tool), SCSI Tutor™, SCSI Bench™ and Drive Light™.

## CORELSCSI PRO

CorelSCSI Pro® is a high-performance software product designed to maximize SCSI performance. CorelSCSI Pro provides: support for SCSI scanners to scan images into any TWAIN-compliant graphics program; a CD-ROM server application that allows network users to retrieve recently-accessed information with essentially no delay; and a utility that writes information to a compact disc using a CD-Recorder. These features and others are available using an intuitive and friendly interface.

*RAIDER WRITABLE CD ARRAYS*  
*RAIDER WRITABLE CD ARRAYS*

The RAIDER™ series of CD-ROM arrays provide a unique hardware solution for minicomputer and network systems. Configurations include multi-SCSI ID or LUNs with a maximum of 56 drives per controller.

The RAIDER series of Writable CD disk arrays provide a unique hardware solution for the production of CDs. The system can be configured for short run duplication of CDs. Configurations can include a mix of hard drives, EO transports, tape unit and multiple CD writers. The system can perform offline from any source to multiple targets.

All systems include an integrated data cache, up to 256Mb per CacheBox, which greatly improves performance.

## *THE JUKEBOX MANAGER*

The Jukebox Manager™ option for Logicraft's LanCD™ network server software provides a versatile solution for networked access to archived CD-ROM storage. It is modular in design, hardware independent and non-vendor specific for jukebox support. Features include Document Image Management, static directory or platter caching and DDC (dynamic hard disk cache), asynchronous access, multiple jukebox support, Intelligent Optical Reader Selection, local on-line management, and support for up to 1280 platters and 56 readers per LanCD server. With up to 10 servers per client, each user could have access to more than 12 thousand CD-ROM discs.

*FASTCD™, LANCD*

FastCD™ is an option available with Logicraft's LanCD™ networking software for providing multiple concurrent access to CD-ROM applications in a multi-platform, multi-protocol networking environment. FastCD creates "virtual CD-ROM discs" on fast, high performance SCSI hard drives by caching the entire contents of a CD-ROM in its native format onto a FastCD partition of the hard disk, providing users with easy access to their CD-ROM applications at hard disk speeds up to 300 times faster than standard CD-ROM drives. FastCD software includes comprehensive status reports, multimedia support, and asynchronous disk access for higher throughput during multiple concurrent accessing.

## *ALLADIN*

Alladin™ is an open architecture, multifunctional video tool. This dependable PC peripheral processes high quality, full resolution video in real time. For making video transitions, Alladin includes a seven input switcher and true 3D DVE with curvilinear effects. Add graphics and titles to your video with titling, character generation, still store, paint, 3D modeling and animation - all with built-in Alpha channel. Alladin's layering capabilities include full linear input key, as well as luminance and chrominance keying. Altogether, Alladin can process four video layers in a single pass. And, since you can customize all Alladin effects, your video productions will never have that "pre-canned" look.

# Pioneer Hi-Fi (GB) Ltd.

*PIONEER*

Pioneer, the leading manufacturer of optical disc technology has developed a solution utilizing it's high storage CD-ROM autochanger. This solution provides stored video clips directly to designated PC's. The Video Browse Server enables users to view the whole of a video library on a PC. This application has a user friendly and logical GUI. The video clips never physically leave the library, hence no time lost tracing material. All of the video is held on CD-ROMs locked away in a 500 disk autochanger. Initially by the use of alphanumeric entries a search can be narrowed down to several titles. A selected title gives further indexed information on the clip and also more importantly at least two thumbnails. The chosen clip can then be viewed on a PC terminal. By selecting various clips the user automatically generates a clip list. This file can then be sent to the compiling station on the network. The compiling station then assembles the request on any chosen broadcast medium- D1, D2, D3, D5, Digital Betacam, Betacam, Disc etc.
