Berg Software Design

DEVICE DRIVER & SOFTWARE DESIGN SERVICES

Berg Software Design is a consulting organization offering software design and implementation services. Brian Berg, its principal, has been a consultant since 1979. He is familiar with SCSI and optical storage devices and standards. Specialties include SCSI device drivers for Windows/DOS, UNIX (particularly Silicon Graphics) and embedded operating systems. Mr. Berg has been a project leader, writer, industry analyst, conference speaker and session chair, patent reviewer, and expert witness. He has worked with many SCSI device types, both in initiator and target mode, and has extensive ASPI experience.

IPT Corporation

CONTRACT PRODUCT DEVELOPMENT

IPT Corporation is a Contract Product Development company specializing in the design, engineering, and manufacturing of electronic products on a turnkey basis. Since 1974, over 300 leading technology companies have turned to IPT to design and develop innovative new technology products, such as embedded controllers and system software.

Today, IPT's product development services provide manufacturers the most viable alternative to building in-house engineering groups to develop new high-tech products. IPT's staff of 45 full-time professionals is organized into fast-moving product development teams specializing in interface electronics, SCSI device drivers and ASPI managers. Other IPT teams provide comprehensive product development services including the following:
–Electronic design
–Software engineering
–Mechanical engineering
–Industrial design
–Turnkey manufacturing
–Specification & documentation

DATA CONVERSION UTILITIES

DCU for DOS and OS/2 is NovaStor's Data Conversion Utility that offers users a SQL (Structured Query Language) conversion application. DCU is media independent allowing for transfers between tape, disk, and optical drives. It allows users to query the data and extract only the information that is vital to their application. DCU provides powerful field-level conversions for numeric formats including COM3, BCD, Zoned Decimal, 2 and 4 byte integer and many more. Users can perform IF-THEN conditional tests bfore reading or processing data. DCU offers support for fixed and variable length records, IBM and ANSI labeled tapes and field-level manipulations.

TAPE PROCESSING UTILITIES

TPU for DOS and OS/2 offers users the ability to read and write any data stored on tape or disk. TPU writes IBM, ANSI or ISO labeled tape formats. It is a flexible utility that allows you to convert between ASCII (American Standard Code for Information Interchange) and EBCDIC (Extended Binary Coded Decimal Interchange Code) character sets, insert delimiters between records, examine tape formats, and convert between media formats (1/4", 4mm, 8mm, 9-track, and 3480/90).

QUTAPE

QuTape is a utility program for use with a streaming tape drive incorporating a SCSI Controller, It implements standard features for tape positioning, and reading or writing any number of blocks at a time to or from the tape. File formatting on input and output to the tape is provided as well. Raw tape data may be displayed on the screen ("dumped") without reading it into a disk file.
