Readme for DS-XG NT4.0 Driver ver. 4.00.1228

Because this driver has various functions depending on the device you use,
you may need a customization on the driver.

Depending on your system configuration, please replace ydsxg.cst with the
one in an appropriate directory under ¥Custtool.

¥Custtool
  ¥DS-1E -> For YMF754(DS-1E)
    ¥2ch -> For generic 2ch system
    ¥Generic 4ch -> For generic 4ch system with 2 AC97 CODECs
    ¥STAC9708_1 -> For STAC9708 4ch system which has separate Jack for Rear
                          output.
    ¥STAC9708_2 -> For STAC9708 4ch system which uses GPIO2 to switch between
                          Line in/Rear output.
  ¥DS-1S -> For YMF754(DS-1S)
    ¥2ch -> For generic 2ch system
    ¥Generic 4ch -> For generic 4ch system with 2 AC97 CODECs
    ¥STAC9708_1 -> For STAC9708 4ch system which has separate Jack for Rear
                          output.
    ¥STAC9708_2 -> For STAC9708 4ch system which uses GPIO2 to switch between
                          Line in/Rear output.

Note
(1) If you need different customization, please ask your rep or your contact at
Yamaha.
