

Installing Novell Clients

The Novell® Client™ Setup utility installs the client software. When you use this utility, you can select the client you want to install from a list of available clients.

PREREQUISITES

- LONG.NAM installed on NetWare® servers for long file names in Windows* 95/98 and Windows NT*
- Connection to a NetWare network
- Applicable server patches installed

HARDWARE REQUIREMENTS

Windows 95/98

- 486 processor or higher
- Minimum 28 MB free disk space
- Minimum 16 MB RAM

Windows NT 4.0

- Minimum hardware requirements of Windows NT 4.0

DOS and Windows 3.1x

- 386 processor or higher
- Minimum 15 MB free disk space
- Minimum 8 MB RAM
- A memory manager

SOFTWARE REQUIREMENTS

One of the following client operating systems:

- Windows 95/98 with Windows 95 or Windows 98 CD-ROM or the Windows .CAB files
- Windows NT 4.0
- A DOS operating system such as:
 - Novell DOS 7
 - MS-DOS* 5.x or 6.x
 - PC-DOS 5.x, 6.x, or 7.0
 - Windows 3.1x or Windows for Workgroups 3.11

PROCEDURE

Note: Documentation explaining network installation methods is available in the online documentation on the Novell Client CD-ROM. This documentation can be viewed on 32-bit workstations and is available from the Setup utility.

1. Insert the Novell Client CD-ROM.

If the Setup utility does not start automatically, run WINSETUP.EXE from the root of the CD-ROM.
2. Click a language for the installation.
3. Click the platform you want to install.
4. Click Install Novell Client, and then follow the on-screen instructions.

5. Do one of the following:
- If you have a NetWare 4™ network or you are using IPX™ protocols, click Custom to configure the Client for an IPX network, and then select the IPX protocol.
 - If you have a NetWare 5™ network and you are using IP protocols, accept the Typical installation.
- Note:** The Novell Client for DOS and Windows 3.1x is an IPX-only client. If you are connecting to a NetWare 5 IP-only server, the server must be running Compatibility Mode (SCMD.NLM) and the network must have a Migration Agent on a NetWare 5 server.
6. To finish installing the Client, follow the on-screen instructions.
