

UP2000/UP2000+

Product Update Notification

# Product Update Notification

## Description of Update

API will be upgrading the UP2000 motherboard to a UP2000+ motherboard effective the end of August. Orders for UP2000 product will be fulfilled with UP2000+ material. Below is a description of the differences between UP2000 and UP2000+ material. Customers should contact their sales representative if they require acceptance testing on the product. UP2000+ product will have the following part number UP2000-B1. Since this is an upgrade, UP2000 product will ship until UP2000+ is available. Initial Warranty and repair claims for UP2000 product will be fulfilled with UP2000 product and not UP2000+ product. API withholds the right to fulfill future UP2000 warranty claims with UP2000+ product.

	UP2000	UP2000+
CPU Configuration	Jumpers Used to configure CPU	Automatic CPU Configuration
Product Part Numbers	UP2000-A3	UP2000-B1
21264B Microprocessors*	No Support	Support provided
