Copyright 2005 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, California 95054, U.S.A. All rights reserved.

Sun Microsystems, Inc. has intellectual property rights relating to technology that is described in this document. In particular, and without limitation, these intellectual property rights may include one or more of the U.S. patents listed at <http://www.sun.com/patents> and one or more additional patents or pending patent applications in the U.S. and in other countries.

This document and the product to which it pertains are distributed under licenses restricting their use, copying, distribution, and decompilation. No part of the product or of this document may be reproduced in any form by any means without prior written authorization of Sun and its licensors, if any.

Third-party software, including font technology, is copyrighted and licensed from Sun suppliers.

Parts of the product may be derived from Berkeley BSD systems, licensed from the University of California. UNIX is a registered trademark in the U.S. and in other countries, exclusively licensed through X/Open Company, Ltd.

Sun, Sun Microsystems, the Sun logo, Java, AnswerBook2, docs.sun.com, and Solaris are trademarks or registered trademarks of Sun Microsystems, Inc. in the U.S. and in other countries.

All SPARC trademarks are used under license and are trademarks or registered trademarks of SPARC International, Inc. in the U.S. and in other countries. Products bearing SPARC trademarks are based upon an architecture developed by Sun Microsystems, Inc. Mozilla is a trademark or registered trademark of Netscape Communications Corporation in the United States and other countries.

The OPEN LOOK and Sun™ Graphical User Interface was developed by Sun Microsystems, Inc. for its users and licensees. Sun acknowledges the pioneering efforts of Xerox in researching and developing the concept of visual or graphical user interfaces for the computer industry. Sun holds a non-exclusive license from Xerox to the Xerox Graphical User Interface, which license also covers Sun's licensees who implement OPEN LOOK GUIs and otherwise comply with Sun's written license agreements.

U.S. Government Rights—Commercial use. Government users are subject to the Sun Microsystems, Inc. standard license agreement and applicable provisions of the FAR and its supplements.

DOCUMENTATION IS PROVIDED "AS IS" AND ALL EXPRESS OR IMPLIED CONDITIONS, REPRESENTATIONS AND WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT, ARE DISCLAIMED, EXCEPT TO THE EXTENT THAT SUCH DISCLAIMERS ARE HELD TO BE LEGALLY INVALID.

Copyright 2005 Sun Microsystems, Inc., 4150 Network Circle, Santa Clara, California 95054, Etats-Unis. Tous droits réservés.

Sun Microsystems, Inc. a les droits de propriété intellectuels relatifs à la technologie qui est décrite dans ce document. En particulier, et sans la limitation, ces droits de propriété intellectuelle peuvent inclure un ou plus des brevets américains énumérés à <http://www.sun.com/patents> et un ou les brevets plus supplémentaires ou les applications de brevet en attente dans les Etats-Unis et dans les autres pays.

Ce produit ou document est protégé par un copyright et distribué avec des licences qui en restreignent l'utilisation, la copie, la distribution, et la décompilation. Aucune partie de ce produit ou document ne peut être reproduite sous aucune forme, par quelque moyen que ce soit, sans l'autorisation préalable et écrite de Sun et de ses bailleurs de licence, s'il y en a.

Le logiciel détenu par des tiers, et qui comprend la technologie relative aux polices de caractères, est protégé par un copyright et licencié par des fournisseurs de Sun.

Des parties de ce produit pourront être dérivées des systèmes Berkeley BSD licenciés par l'Université de Californie. UNIX est une marque déposée aux Etats-Unis et dans d'autres pays et licenciée exclusivement par X/Open Company, Ltd.

Sun, Sun Microsystems, le logo Sun, Java, AnswerBook2, docs.sun.com, et Solaris sont des marques de fabrique ou des marques déposées de Sun Microsystems, Inc. aux Etats-Unis et dans d'autres pays.

Toutes les marques SPARC sont utilisées sous licence et sont des marques de fabrique ou des marques déposées de SPARC International, Inc. aux Etats-Unis et dans d'autres pays. Les produits portant les marques SPARC sont basés sur une architecture développée par Sun Microsystems, Inc. Mozilla est une marque de Netscape Communications Corporation aux Etats-Unis et à d'autres pays.

L'interface d'utilisation graphique OPEN LOOK et Sun™ a été développée par Sun Microsystems, Inc. pour ses utilisateurs et licenciés. Sun reconnaît les efforts de pionniers de Xerox pour la recherche et le développement du concept des interfaces d'utilisation visuelle ou graphique pour l'industrie de l'informatique. Sun détient une licence non exclusive de Xerox sur l'interface d'utilisation graphique Xerox, cette licence couvrant également les licenciées de Sun qui mettent en place l'interface d'utilisation graphique OPEN LOOK et qui en outre se conforment aux licences écrites de Sun.

LA DOCUMENTATION EST FOURNIE "EN L'ÉTAT" ET TOUTES AUTRES CONDITIONS, DECLARATIONS ET GARANTIES EXPRESSES OU TACITES SONT FORMELLEMENT EXCLUES, DANS LA MESURE AUTORISÉE PAR LA LOI APPLICABLE, Y COMPRIS NOTAMMENT TOUTE GARANTIE IMPLICITE RELATIVE À LA QUALITÉ MARCHANDE, À L'APTITUDE À UNE UTILISATION PARTICULIÈRE OU À L'ABSENCE DE CONTREFAÇON.

Support for Sun MSF 1.1.0 With Sun MTP 8.0.1

Sun™ Mainframe Transaction Processing Software (Sun MTP), Release 8.0.1 with a minimum patch level of 8, now supports Sun Mainframe Security Facility (Sun MSF), Release 1.1.0. This document contains the following sections:

- “[Usage Limitations With Sun MTP 8.0.1](#)” on page 2
- “[New Error Messages](#)” on page 3
- “[Notes About the Sun MTP 8.0.1 Documentation](#)” on page 4
- “[Notes About the Sun MSF 1.1.0 Documentation](#)” on page 5

Refer to the following documents for information about Sun MSF 1.1.0:

- *Sun Mainframe Security Facility Release Notes for Solaris Platforms*
- *Sun Mainframe Security Facility Administrator’s Guide*

These documents are available in the Sun Mainframe Transaction Processing Software Collection 8.1.0 at the web site:

<http://docs.sun.com>

Note – Sun MSF 1.1.0 obsoletes Sun MSF 1.0.0, Sun MSF 1.0.1, and their associated patches.

Usage Limitations With Sun MTP 8.0.1

When running Sun MSF 1.1.0 with Sun MTP 8.0.1, be aware of the following limitations:

- You can only use the Sun Java System Directory Server (LDAP directory), minimum release of 5.2, on platforms running the Solaris 9 and Solaris 10 operating systems.

On the Solaris 9 and 10 OS, a Sun MTP region with Sun MSF configured with an LDAP directory as a repository might fail to start. This problem is caused by a known bug in the NSS libraries. (CR 6210080)

To work around this problem, the superuser must configure the directories containing those NSS libraries as trusted directories using the `crle` command. For example:

```
# crle -u -s /usr/lib/mps
# crle -u -s /usr/lib/mps/secv1
```

- Configuring and using additional roles for a principal other than the primary role is not supported.
- The CESN login screen does not contain a Group Name field. Therefore, users can only login with a user ID.
- The EXEC CICS SIGNON GROUPID option is not supported.
- The EXEC CICS QUERY SECURITY API is not supported.
- Not all of the RESP2 codes documented in the *Sun Mainframe Transaction Processing Software Developer's Guide* for the following EXEC CICS commands are supported:
 - CHANGE PASSWORD
 - SIGNON
 - VERIFY PASSWORD
- The Sun MSF high availability data service for Sun Cluster is not supported with Sun MTP 8.0.1.

New Error Messages

The following error messages are not in the *Sun Mainframe Transaction Processing Software Message Guide* for Release 8.0.1.

KIX4010E External Security: NSS function %s failed: status = %d

Description: The specified NSS crypto function failed with the indicated status while Sun MTP was attempting to encrypt a user password.

Solution: To interpret the error status, refer to the NSS error codes section in the SSL Reference document on the Mozilla™ web site¹:

<http://www.mozilla.org/projects/security/pki/nss/ref/ssl/>

If the error indicates that the NSS libraries cannot be located, and you are running on a Solaris 8 system, the libraries have not been properly specified in the LD_LIBRARY_PATH environment variable. You must add them to the environment variable in the Sun MTP region setup file, and retry. On Solaris 9 and 10 systems, Sun MTP explicitly tries to locate those libraries under the directories /usr/lib/mps and /usr/lib/mps/secv1, so if the error indicates that the NSS libraries cannot be located, or any other error, contact your authorized service provider.

KIX4011E External Security: invalid trust token

Description: The Sun MTP trust token has been rejected as invalid by the Sun MSF security server.

Solution: This message indicates an internal error between Sun MTP and Sun MSF. Contact your authorized service provider.

KIX4012E External Security: PK11 context not initialized; password encryption failed

Description: Sun MTP was unable to complete NSS crypto initialization, which is needed for password encryption.

Solution: On a Solaris 8 system, verify that the required NSS libraries are specified in the LD_LIBRARY_PATH environment variable. If the libraries are not specified, add them to the environment variable in the Sun MTP region setup file,

1. Sun is not responsible for the availability of third-party web sites mentioned in this document. Sun does not endorse and is not responsible or liable for any content, advertising, products, or other materials that are available on or through such sites or resources. Sun will not be responsible or liable for any actual or alleged damage or loss caused by or in connection with the use of or reliance on any such content, goods, or services that are available on or through such sites or resources.

and retry. On Solaris 9 and 10 systems, MTP explicitly tries to locate those libraries under /usr/lib/mps and /usr/lib/mps/secv1, so for this and any other error, contact your authorized service provider.

KIX4013E External Security: invalid encrypt method %s; password encryption failed

Description: The specified encrypt method was not recognized by Sun MTP, and therefore, password encryption cannot be done for the user who is attempting to log in.

Solution: This message indicates an internal error between Sun MTP and Sun MSF. Contact your authorized service provider.

KIX4041I External Security: Invalid password constraints; %s

Description: The password constraints (minimum and maximum length and format) returned from the external security manager are not recognized by Sun MTP.

Solution: Contact your authorized service provider.

Notes About the Sun MTP 8.0.1 Documentation

This section identifies information in the Sun MTP 8.0.1 documentation set that is no longer accurate when Sun MSF 1.1.0 is used as the external security manager.

Sun Mainframe Transaction Processing Software Administrator's Guide

Chapter 8, "Sun MTP Secure," : Ignore references to Chapter 9; refer instead to the *Sun Mainframe Security Facility Administrator's Guide*.

Chapter 8, "Sun MTP Secure," section "Using the KIX-FILES Resource Class": The information in this section is not accurate. The correct information is as follows:

The KIX-FILES resource class controls access to the VSAM catalog, which is a VSAM dataset with the name CATALOG. By granting or denying KIX-FILES read permission on the CATALOG dataset, users are granted or denied permission to view VSAM file definitions in the VSAM catalog using the CFMS transaction. By granting or denying KIX-FILES write permission on the CATALOG dataset, users are granted or denied permission to create, delete, or modify VSAM files defined in the VSAM catalog using the CFMS transaction.

VSAM file access by batch programs is not controlled by Sun MTP Secure.

Sun Mainframe Transaction Processing Software Configuration Guide

Chapter 2, “Setting Region Environment Variables,” section “Sun MSF Environment Variables”: Ignore the reference to the `EMPSECURITY` environment variable.

Notes About the Sun MSF 1.1.0 Documentation

This section identifies information in the *Sun Mainframe Security Facility Administrator’s Guide* that does not match the Sun MTP 8.0.1 environment.

- Chapter 7, “Integrating With Sun MTP,” section “Authenticating Users and Roles”: This section contains information about CESN support for users and roles, which is not supported on Sun MTP 8.0.1.
- Chapter 7, “Integrating With Sun MTP,” section “Primer Sample Application Resources”: The sample directory structure changed in Sun MTP 8.1.0; therefore, references to the `README.txt` file in the `cobol_mf` directory are not valid.
- Chapter 7, “Integrating With Sun MTP,” section “MQ and MQ-JMS Bridge Sample Application Resources”: In Sun MTP 8.0.1, the `readme` file is named `README.doc` rather than `README.txt`.
