

Compaq Deskpro Workstations AP250

Professional Workstations power and graphics performance at PC prices

The new *Compaq Deskpro™ Workstation AP250* combines the manageability and affordability of *Deskpro* computers with the power and graphics performance of *Compaq Professional Workstations*. Demanding computer aided design (CAD), computer aided engineering (CAE), digital content creation (DCC) and financial analysis applications are processes that require advanced workstations with graphics horsepower. The new *Deskpro Workstation AP250* meets these demanding requirements at an affordable price.

The convertible chassis design allows for increased flexibility in space-constrained working environments, and Compaq Intelligent Manageability features, such as Alert-on-LAN (AOL) and Remote Management, further reduce overall total cost of ownership. Powered by an Intel® Pentium III® processor, the *Deskpro Workstation AP250* operates on an industry-standard Intel and Microsoft® Windows NT® platform, ensuring it will fit smoothly into virtually any enterprise.

The *Deskpro Workstation AP250's* broad graphics offering via the Graphics Excellence Program—and thorough testing and certification on all of the leading business and workstation-class applications—makes it the perfect fit for today's rapidly changing and demanding business environment.
