LAN ADAPTER

DMF-560TX

Fax/Modem 10/100Mbps PC Card

Advanced Engineering & Compact Design
This card is equipped with a processor and memory to perform fax modem transmission, alleviating the host computer's CPU workload while freeing up its memory.

Fast Modem Speed & Battery Saving
The card has a built-in high-speed modem, performs error correction and data compression, and consequently saves the notebook's battery life while running cooler and working faster.

Features
- PCMCIA 2.1 and JEIDA 4.1 compliant
- NE-2000 compatible
- Digital line protection
- PCMCIA client enabler support
- Concurrent use of LAN and fax/modem operation
- Menu-driven installation utility and LAN diagnostics program
- Low power consumption, automatic sleep mode
- Dual-speed 10BASE-T/ 100BASE-TX connection

Fax/Modem
- V.90, K56flex (56Kbps)
- Error correction & data compression V.42/V.42bis and MNP Class 2 to 5

LAN Drivers
- Novell NetWare Client
- Microsoft Windows 3.x, 95, NT
- Microsoft LAN Manager
- Artisoft LANtastic
- IBM LAN Support
- FTP TCP/IP
- Banyan VINES

Connectors
- RJ-11 phone cable plug
- RJ-45 LAN plug

Telecom Certification*
- FCC Part 68
